

The Agenda

When we keep an egg safe, it will provide nourishment providing good health.

If we allow the egg to be cracked, it will decay into venom to kill us.

When we keep the constitution and its amendments safe, it will save our lives.

If we allow them to be modified by the courts, they will destroy our lives.

Keep our constitution and its amendments whole, so we will be secure. No cracks of compromise, not even the smallest crack.

This is a list of actions that we may consider.

Start now with cases that end up at the Supreme Court.

First, we need to defend the Supreme Court to have 9 judges.

The Supreme Court cannot be manipulated in a short time period for the advantage of the current government. We can only change things like elections for the election after next or the number of court judges for the government after the next.

Second, we need to defend the "*Bill of Rights*".

We need to remove all State and US Government laws of any kind that limits the **citizen's rights** to any and all of these rights. No local, State, or National government invasion of our constitutional rights can be tolerated. There can be **No limits of any kind for anything**, like taxes or imprisonment, especially on our religious organizations or guns or freedom of speech.

The people approving an amendment can only change the "*Bill of Rights*" and other parts of the Constitution. All other attempts to change the Constitution are not Constitutional. If the Supreme Court believes the Constitution should be interpreted in some other way then let them request an amendment to the Constitution. By the way, the right to bear arms is used to support the *Minute Men* that will defend the Constitution.

Third, we need to return to the Judeo-Christian heritage.

The Constitution's founding fathers documented that the constitution will only work if the citizens of the country are of the Judeo-Christian heritage. Therefore, we must return our schools, books, and educational TV at all levels, to the Judeo-Christian heritage and say allegiance to our flag, Constitution, and our country so help me God. We need to keep only Judeo-Christian educators that pledge to defend the Constitution from foreign and domestic enemies. Other beliefs are tolerated, however cannot hold office because we will lose our Constitution. This was the America of my youth.

Our family has a most excellent medical doctor that immigrated to our country. He is now part of our country as we are and loves our country as we do. He came and is a living practicing Islam, while mixing with the rest of us. He is truly an American. He loves his freedom here.

The United States years ago stopped immigration so all the different people could mix together to become Americans. However, in 1965 immigration started again so we could slowly include people that had special talents to enrich our country. However, some politicians opened the floodgates to include not people but groups of people that have failed to mix with the rest of us. However, this policy of mixing with us is required to become an American citizen. It is not setting up isolated locations in America and trying to install their own government and law. This is a serious problem and some attention is going to be needed to fix this mess.

Looking at our heritage, our history, we see that President Jefferson got copies of the Koran and studied them to see how to deal with Islam. He concluded that they were unreliable and would break their word and treaties. He therefore created a branch of our armed services to handle this problem, the Marines to physically engage them in battle.

They have a different set of ethics than our culture. They must be given the opportunity to correct this difficulty. Given they have not mixed into America why do we allow them to be citizens and in our government?

The only answer I have is that there are some politicians that want to destroy the Constitution and replace it with socialism. They believe treason is correct.

Fourth, undo what Supreme Court Justice Black did in 1940.

Require the definitions used to define the constitution and its amendments to be defined using the definitions of the time they were created. Remove the inappropriate definitions so we can restore states rights and remove centralized government.

Fifth, we need to assign prosecutors and judges in law cases.

They must be independent from future governments. We must not allow justice to be stolen from the people because of some future government interfering. The executive branch can forgive a sentence based on the constitution.

Sixth, we must publicly punish political prisoners committing treason.

For example people that try to steal elections. We need to have supervision over the court system to punish judges committing treason. There are no 4k videos recording the judges, the plaintiff, defendant, and jury in the courtroom. We have the right to be considered innocent until proven guilty. Judges must enforce only the use of analytical data not emotional data or their prejudice. We have the right to see our accuser and be able to defend our self until we are done. We have the right to receive filings so they can be reviewed before court. With variable work hours, we must consider everyone's circadian cycle. We need court times during our "day". We need court police to defend everyone in court. In addition, they must be aware of treasonable acts committed by judges. The recordings will be used for prosecution.

The next thing to consider is do we have enough conservative states to pass amendments to the constitution to stop the liberal erosion of the Constitution and their replacing it with socialism?

What can we do to remove the threat of a cold war? The genocide of Christian and Jewish religions from foreign and domestic enemies must be stopped. Islam states like Iran and Palestine and other dictators are creating unrest to the worldwide Judeo-Christian societies through the world.

Why did we not have debates of substantive topics? When the Constitution was created with the Bill of Rights its purpose was for national defense, international trade, and interstate commerce. When were these most fundamental issues debated?
